PSYCHOLOGICAL ABSTRACTS

VOLUME 72, SUBJECT INDEX I

JANUARY-DECEMBER 1985

Why can't they publish an abstract service tailored to my professional interests to save me time and effort?

They have.

It's the American Psychological Association's **PsycSCAN**, a series of inexpensive, subject-oriented publications with abstracts of the primary literature *in applied, clinical, and developmental psychology and in learning disorders and mental retardation (LD/MR).* PsycSCANs provide an overview of these fields so you can keep pace with new information and identify articles for further research—quickly and easily.

Each PsycSCAN publication covers one of the four areas, is issued quarterly (about 75 pages), and includes full bibliographic information. You get more than 1,500 abstracts in a one-year period in the discipline of your choice.

For LD/MR, abstracts are selected from the PsycINFO database taken from over 1,000 journals. The applied, developmental, and clinical PsycSCANs abstract *subscriber-selected* APA and non-APA journals. Every article in these journals will be abstracted and published in PsycSCAN. You'll vote for changes annually *as your professional needs change.*

PsycINFO

***Psychological Abstracts Information Services (PsycINFO)* is a family of interrelated information services that provides access to the world's literature in psychology and related behavioral and social sciences in a variety of ways. *PsycINFO* consists of:**

Psychological Abstracts (PA) journal (ISSN No. 0033-2887). The comprehensive monthly compilation of nonevaluative summaries of the world's literature in psychology and related disciplines.

Issue. The monthly **PA** issues contain abstracts listed under 16 major classification categories, with some categories having subsections, as shown in the Table of Contents. Under each classification heading, the abstracts are arranged alphabetically by first author. Abstracts are numbered consecutively each year. The volume contains approximately 33,000 abstract records.

Indexes. An author and brief subject index appear in each monthly issue. A cumulated index of each is published in each third issue. An expanded and integrated annual index is published at the end of each volume.

Three-Year Cumulative Indexes To PA. Author and subject indexes for all entries in the **PA** journal for 1969-1971, 1972-1974, 1975-1977, 1978-1980, and 1981-1983.

PsycSCAN: Clinical Psychology. A quarterly publication containing abstracts from subscriber-selected journals in the area of clinical psychology.

PsycSCAN: Developmental Psychology. A quarterly publication containing abstracts from subscriber-selected journals in the area of developmental psychology.

PsycSCAN: Applied Psychology: A quarterly publication containing abstracts from subscriber-selected journals in the area of applied psychology.

PsycSCAN: LD/MR: A quarterly publication containing abstracts on learning disabilities, communication disorders, and mental retardation.

PsycINFO Retrospective: Mental Retardation (An Abstracted Bibliography, 1971-1980). A comprehensive 10-year review including abstracts on mental retardation.

PsycINFO Retrospective: Learning and Communication Disorders (An Abstracted Bibliography, 1971-1980). A comprehensive 10-year review including abstracts on learning disabilities and communication disorders.

The Thesaurus of Psychological Index Terms: 4th edition. A compilation of the vocabulary used in psychology and related disciplines as generated from the files of **PA**. The Thesaurus is divided into two sections: the *Relationship Section* and the *Rotated Alphabetical Terms Sections.*

PsycINFO Users Reference Manual: 1981 edition. Developed for the individual researcher of the information available from PsycINFO services, whether through use of the printed **PA** issues and indexes or by computer assisted search of the data base.

PASAR (PA Search and Retrieval). Retrospective search and retrieval service available through the PsycINFO office.

PsycINFO Database. Magnetic tapes of PsycINFO records to institutions for annual lease or license. Designed for use by information analysts and dissemination centers, the PsycINFO Database is also used for direct interaction by individuals through a computer terminal in their own facilities. This service is available through several dissemination centers throughout the world.

This Annual Subject Index, published in two volumes, consolidates more than 120,000 references to approximately 33,000 abstract records published in 12 monthly issues of *Psychological Abstracts* from January 1985 through December 1985. A companion work, the Annual Author Index, references these records by author and document title.

Index terms, selected from the *Thesaurus of Psychological Index Terms*, represent the literature covered for the periods indicated. Only terms assigned as major terms, reflecting the main focus of the article, appear in the printed subject index. (Terms assigned as minor do not appear in print but are available for online searching.) Subject matter content determines the specific terms used and, thus, not every thesaurus term will appear in every index. "See" and "See Also" references are present to direct the user to the preferred terminology or related areas of interest. Index phrases are alphabetically arranged under the appropriate index terms and represent a concise statement of the article's content or, when appropriate, identify the independent and dependent variables described in the material as well as the subject population. Style changes such as the increased use of abbreviations or the elimination of some hyphens may result in some inconsistencies and may affect the alphabetical order of phrases.
